

## **Rummy game Software Terms**

hereinafter called “Rummy Game Owner (RGO)” or Client or Rummy game owner) and **MBHiTech Solutions** hereinafter called “Rummy Game Developer” or Rummy game developer and hereinafter referred as RGD or Developer) and both Parties hereto have agreed as follows:

WHEREAS RGO and RGD desire to enter into an agreement to do rummy game Development with rummy game website and android app development for lum sum amount mentioned on our website [mbhitech.com](http://mbhitech.com) pricing menu. RGD have already rummy game developed on two platforms web application (browser based) and android app. RGD will provide ready available rummy game as it is available on domain [rummy sahara.com](http://rummy sahara.com) demo. RGD will provide all source code related to rummy game platform without any restrictions and limitations after all payment clearance from RGO. RGO can modify and can do any changes in future as well as can do advance development as per their own requirement and risk but it is strictly restricted to distribute and sell to any other person or company for free or for paid. It is single domain license and you can use for one live domain only and if you want to run rummy game online on multiple domains then buy additional licenses or buy developer license for multiple domains. We do not allow you to sell or distribute this code and if such things happen and identified then you will be responsible for that and it will force us to claim all loss legally.

### **General Terms:**

MBHiTech Solutions (RGD) will provide 13 card Indian rummy game along with all server requirements and setup documents.

Delivery: immediate after payment, you will get email to download rummy game application source code and even you can see download option in your account. After that you can download and setup rummy game as per given instructions in documents. Also we will provide assistance for setup rummy game and explain code to your concern developers what, which and for what functions and coding used and where.

RGD have not used any third party paid services like api. We have used all programming open source to develop rummy game.

RGD have used all programming open sourced like php, javascript, java, express js, jade, nodejs, and socket like this also used additional scripting languages open source as per necessary.

Real time multiplayer game handler we have developed and merged into application. So no external paid service used and it is for unlimited concurrent players. But server capacity matters.
